B2 Token Whitepaper

---

1 Introduction

B2 is a deflationary utility token deployed on BNB Smart Chain. Inspired by the iconic B-2 Spirit stealth bomber, it combines simplicity and strength, aiming to build a community-driven ecosystem.

With a **fixed supply of 21 million tokens**, B2 is designed to incentivize long-term holding and reduce circulating supply over time through built-in deflationary mechanics.

---

2 Token Details

- **Contract address:** `0x95a7fa18a399d1d4498c1662f8e60918f8d46b36`
- **Total supply:** 21,000,000 B2
- **Burn mechanism:** 1% of each transfer
- **Transaction tax:** 4% per transfer
- **No minting:** Fixed supply, no additional tokens can ever be minted

---

3 Official Wallets

- **Deployer Wallet:** `0xc1eeba5f1d4cf00b7871a05663B890cf2C10a187`
- **Vault:** `0x1b6e2676911F40B7754572A166A54cB2Cbb5d72e`
- **Founder Reserve:** `0x56Cd9120B63c9a07e45Fd2ef6729BA447c85Ed74`

---

4 Initial Distribution & Strategy

- **Liquidity pool:** Seeded with initial BNB/B2 pairing to provide trading liquidity.
- **Vault allocation:** Reserved for future liquidity additions, potential partnerships, and emergency funding.
- **Founder reserve:** Set aside as a long-term incentive for project growth and alignment.

No tokens are pre-allocated to marketing or airdrops at this time, focusing instead on organic growth and community engagement.

---

5 Vision & Philosophy

B2 Token aims to build an engaged community that values simplicity, transparency, and strong fundamentals. Inspired by stealth technology, B2 focuses on long-term resilience rather than hype-driven growth.

6 Roadmap (High-level)

- **Phase 1:** Token creation, contract verification, and initial liquidity pool setup
- **Phase 2:** Public website and documentation
- **Phase 3:** Expand community & marketing
- **Phase 4:** Listing on token trackers (e.g., CoinGecko, CoinMarketCap)
- **Phase 5:** Evaluate further development opportunities and DApp integrations
